Profile

I'm a passionate frontend developer who enjoys building web solutions that serve businesses, improve user experience, and solve real-world problems. I'm quick to learn new tools, a natural problem solver, and I thrive when creating responsive, optimized, and accessible web interfaces from scratch to deployment.

I'm skilled in HTML, CSS, JavaScript, React, Tailwind CSS, TypeScript, Next.js, Git & GitHub. I'm especially drawn to JavaScript and love building in its ecosystem. My goal is to not just build, but to build useful platforms that make people's lives easier and businesses more efficient.

I'm also big on digital inclusion and enjoy giving back to the tech and Web3 communities through advocacy and content.

Skills

- Languages & Frameworks: HTML, CSS, JavaScript, TypeScript, React.js, Next.js

- Styling, Animation & Tools: Tailwind CSS, Bootstrap, GSAP, Framer Motion, Git, GitHub

- Other Skills: UI/UX Research, Responsive Design, Content Writing, Communication, Team Collaboration
