

OBASI VERA

Frontend Developer (Next.js, React, TypeScript)

Email: ifebuchejulia@gmail.com | Phone: +234 915 736 5242

Location: Abuja, Nigeria Portfolio: obasi-vera.vercel.app

GitHub: github.com/juverasworld | LinkedIn: linkedin.com/in/obasi-vera-a8b155198

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of production experience building, shipping, and maintaining web applications using Next.js, React, and TypeScript. Proven track record delivering real impact across healthcare SaaS, fintech, edtech, and independent product development — including a platform serving 1,000+ daily active users across 20+ federal hospitals in Nigeria. Experienced in REST API and GraphQL integration, role-based UI architecture, Paystack/Monnify payment flows, and translating Figma designs into responsive, accessible interfaces. Capable of working independently to ship full products end-to-end as well as collaborating effectively in agile engineering teams.

TECHNICAL SKILLS

Frontend: Next.js (App Router, Pages Router, SSR/SSG/ISR, Middleware), React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Styling & UI: Tailwind CSS, Material UI (MUI), CSS Modules, GSAP, Framer Motion, Responsive Design, Mobile-First Layouts

Data & APIs: TanStack Query (React Query), GraphQL, REST API Integration, Async Data Fetching, Redux Toolkit, Client-Side State Management

Payments & Integrations: Paystack, Monnify, Google Sheets (Apps Script), WhatsApp API flows

Tools & Workflow: Git, GitHub, Storybook, Agile/Scrum, Code Reviews, Figma, Adobe XD, VS Code, Chrome DevTools

Best Practices: Reusable Component Architecture, Performance Optimization, WCAG Accessibility Basics, Cross-Browser Compatibility, Design Systems

PROJECTS

Naira Sense — Personal Finance Web App Live: <https://moneyscheduler-wmmy.vercel.app/>

A fintech web app built for Nigerian users featuring a 7-day free trial model, Paystack and Monnify payment integration, savings goals tracker, debt management, bill reminders, salary split planner, financial health score, and WhatsApp-based payment and support flow. Built as a single-file HTML/CSS/JS architecture with a localStorage-first data layer.

Stakecut — Social Fintech Platform Live: <https://www.stakecut.com/> A social fintech platform empowering creators, vendors, and affiliates to earn commissions promoting digital products. Built and maintained dashboards, landing pages, and complete user flows for both affiliates and vendors using Next.js, TypeScript, and Tailwind CSS.

Daba School / Digital Abundance — Edtech Platform Live: <https://www.daba.school> | Financial education and wealth-building platform. Contributed to landing pages, course discovery, student dashboards, enrollment and analytics API integrations, and performance optimization using Next.js, TypeScript, Material UI, and React Query.

My Family Companion — Book Launch Platform Live: <https://myfamilycompanion.org/> Book launch and e-commerce site with Paystack payment gateway integration, built with Next.js, JavaScript, and Tailwind CSS.

Soul Sync — Emotional Wellness Journal Live: <https://soul-sync-xjqs.vercel.app/> A digital journaling platform for tracking emotions, reflecting intentionally, and syncing thoughts, moods, and purpose. Built with Next.js, Tailwind CSS, and Redux.

Document to Speech Live: <https://document-speech-rlwg.vercel.app/> Web application for converting text documents to audio files, built with Next.js, JavaScript, and Tailwind CSS.

PROFESSIONAL EXPERIENCE

Frontend Engineer | EmergeResources (IMAS One Healthcare Portal) August 2025 – Present

- Maintain and improve a production Next.js and React SaaS platform supporting inventory management and hospital workflows across 20+ federal hospitals in Nigeria, serving 1,000+ daily active users
- Architected a role-based dashboard filtering system across 15+ pages using a shared permission pattern (`allPlatforms(permission)`), eliminating per-page logic duplication and improving maintainability
- Resolved cache collision bugs caused by empty `queryKey` arrays in TanStack Query, improving data consistency across multi-role views

- Built and maintained reusable React components with Material UI, improving UI consistency and reducing development time by 35%
- Integrated frontend features with backend REST APIs and GraphQL using TanStack Query, reducing API overhead by 20%
- Fixed UI bugs and frontend logic issues across multi-role dashboards, improving overall application stability by 30%
- Ensured responsive layouts and cross-browser compatibility across all modern browsers

Frontend Developer | Stakecut May 2024 – Present

- Develop and maintain dashboard-style web applications using Next.js, React, TypeScript, and Tailwind CSS
- Built complete affiliate and vendor dashboards, landing pages, and user onboarding flows supporting the platform's commission-based fintech model
- Optimized page load performance by 40% (reducing LCP from ~6s to ~3.5s) through code splitting, lazy loading, and efficient data fetching strategies
- Reduced user-facing errors by 25% by fixing validation issues and improving frontend logic
- Translated Figma designs into responsive, production-ready UI components
- Participated in code reviews, sprint planning, and collaborative Git workflows

Frontend Developer | Daba School March 2024

- Built student dashboards and course management features using Next.js and TypeScript
- Integrated REST APIs for surveys, enrollment, analytics, and progress tracking
- Debugged and resolved a Next.js Middleware URL case-sensitivity issue on Vercel caused by Linux vs macOS file system differences, restoring platform stability
- Improved UI navigation and user experience, contributing to a 20% increase in daily active users
- Contributed to landing pages and course discovery features for the Digital Abundance parent platform

Frontend Developer | Enugu State Tech Hub (ESTHub) September 2023 – February 2024

- Built and maintained 50+ responsive web applications using modern frontend technologies
- Fixed cross-browser UI issues across Chrome, Firefox, Safari, and Edge, reducing compatibility bugs by 45%
- Improved page load speed by 30% through frontend performance optimizations
- Converted Figma and Adobe XD designs into accessible, responsive interfaces using mobile-first design principles

Junior Frontend Developer | Nurika Health January 2023 – August 2023

- Maintained a healthcare management frontend built with React.js under senior engineering guidance
- Integrated REST APIs for patient and record management
- Fixed UI bugs and implemented incremental feature improvements with a focus on clean code, accessibility, and performance

Web Development Intern | Verbum Networks August 2022

- Built foundational React skills including hooks, component patterns, and state management
 - Implemented responsive layouts using CSS Flexbox and Grid
 - Assisted with bug fixes and UI implementation using Git for version control
-

EDUCATION

Bachelor of Science in Economics Nnamdi Azikiwe University, Awka | 2017 – 2022

CERTIFICATIONS

- React and Frontend Engineering – Scrimba (2023)
- Full-Stack Web Development – freeCodeCamp (2022)
- JavaScript Algorithms and Data Structures – freeCodeCamp (2022)
