

OBASI VERA

Junior Frontend Developer (Next.js, React, TypeScript)

Email: ifebuchejulia@gmail.com

Phone: +234 915 736 5242

Location: Abuja, Nigeria

Portfolio: <https://obasi-vera.vercel.app>

GitHub: <https://github.com/juverasworld>

LinkedIn: <https://linkedin.com/in/obasi-vera-a8b155198>

PROFESSIONAL SUMMARY

Junior Frontend Developer with 2+ years of hands-on production experience building and maintaining web applications using Next.js, React, and TypeScript. Experienced in fixing UI bugs, implementing product features, integrating REST APIs, and building reusable React components under senior engineering guidance. Strong foundation in responsive design, Tailwind CSS, cross-browser compatibility, and modern frontend best practices. Motivated to grow through mentorship while contributing reliably to real production systems.

TECHNICAL SKILLS

Frontend Technologies

Next.js (Pages Router, App Router), React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

Styling & UI

Tailwind CSS, CSS Modules, Material UI, Responsive Design, Mobile-First Layouts, Component-Based UI Development

Data & APIs

REST API Integration, Async Data Fetching, TanStack Query (React Query), Client-Side State Management

Tools & Workflow

Git, GitHub, Version Control, Agile Development, Code Reviews, VS Code, Chrome DevTools, Figma

Best Practices

Reusable Components, Code Readability, Bug Fixing, Cross-Browser Compatibility, Accessibility Basics (WCAG), Performance Optimization

PROFESSIONAL EXPERIENCE

Frontend Engineer | EmergeResources

August 2025 – Present

- Maintain and improve a production Next.js and React platform supporting inventory management systems and hospital workflows across more than 20 federal hospitals in Nigeria, with 1000+ daily active users
- Fix UI bugs and frontend logic issues across multi-role dashboards, improving overall application stability by 30%
- Build and maintain reusable React components using Material UI, improving consistency and reducing development time by 35%
- Integrate frontend features with backend REST APIs and GraphQL using TanStack Query, and utilizing MUI capabilities, reducing API overhead by 20%
- Work closely with senior engineers to plan tasks, implement features, and apply code review feedback
- Ensure responsive layouts and cross-browser compatibility across modern browsers

Frontend Developer | Stakecut

May 2024 – Present

- Develop and maintain dashboard-style web applications using Next.js, React, TypeScript, and Tailwind CSS

- Implement new frontend features and UI improvements based on product and business requirements
- Reduce user-facing errors by 25% by fixing validation issues and improving frontend logic
- Optimize page load performance by 40% using code splitting, lazy loading, and efficient data fetching
- Participate in code reviews, sprint planning, and collaborative Git workflows
- Translate Figma designs into responsive, production-ready UI components

Frontend Developer | Enugu State Tech Hub (ESTHub)

September 2023 – February 2024

- Built and maintained 50+ responsive web applications using modern frontend technologies
- Fixed cross-browser UI issues across Chrome, Firefox, Safari, and Edge, reducing compatibility bugs by 45%
- Improved page load speed by 30% through frontend performance optimizations
- Converted Figma and Adobe XD designs into accessible and responsive interfaces
- Applied mobile-first design principles to ensure consistent layouts across devices

Frontend Developer | Daba School

March 2024

- Built student dashboards and course management features using Next.js and TypeScript
- Integrated REST APIs for surveys, enrollment, analytics, and progress tracking
- Improved UI navigation and user experience, increasing daily active users by 20%
- Collaborated with backend developers to ensure smooth frontend-backend integration

Junior Frontend Developer | Nurika Health

January 2023 – August 2023

- Worked under senior engineers to maintain a healthcare management frontend built with React.js
- Fixed UI bugs and implemented incremental feature improvements
- Integrated REST APIs for patient and record management
- Applied best practices for clean code, accessibility, and performance

Web Development Intern | Verbum Networks

August 2022

- Learned React fundamentals, including hooks, component patterns, and state management
 - Implemented responsive layouts using CSS Flexbox and Grid
 - Used Git for version control and collaborative development
 - Assisted with bug fixes and UI implementation
-

EDUCATION

Bachelor of Science in Economics
Nnamdi Azikiwe University, Awka
2017–2022

CERTIFICATIONS

React and Frontend Engineering – Scrimba (2023)
Full-Stack Web Development – freeCodeCamp (2022)
Next.js and Modern React Patterns – Advanced Courses and Documentation (2024)
JavaScript Algorithms and Data Structures – freeCodeCamp (2022)
